

BIRDS SANITATION PROTOCOLS

What can employees do?

WASH YOUR HANDS

Wash your hands with warm soapy water for 20 seconds before taking your next client. If you can't wash, use hand sanitizer.

NECK STRIPS AND CAPES

Always use a neck strip. Change out capes after every client.

EQUIPMENT

Sanitize and disinfect all your equipment between clients.

STATIONS

Wipe all surfaces at your station with Cavicide at least twice a day. Try hanging your tools instead of placing them on a towel. Or replace the towel more often.

PRODUCTS

Popsicle sticks are available to use in pucks to prevent cross-contamination between clients.

SNACKS

Avoid sharing food. Pour snacks into personal containers and don't scoop out with your hands.

MOST IMPORTANTLY: Please stay home if you are not feeling well.
